PROFILE SUMMARY

Computer Science Engineering graduate with hands-on experience in Data Science, Machine Learning, and AI, with a strong foundation in Python and data-driven problem solving. Experienced in data preprocessing, exploratory data analysis, statistical analysis, machine learning, and building AI-powered solutions using Python, Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV, and YOLOv8. Also have a solid understanding of software development and APIs, enabling me to build and integrate practical ML solutions into real-world applications. Passionate about turning data into meaningful insights, solving complex problems, and continuously learning emerging technologies in AI and Machine Learning.

EDUCATION

- NPSEI Pithoragarh, Uttarakhand Technical University
  Bachelor of Technology in Computer Science, 2026
- Udayan International School, Champawat, CBSE Board Intermediate, 2022 Marks: 62.4%
- Udayan International School, Champawat, CBSE Board High School, 2020 Marks: 84.6%

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript
- **Data Science:** NumPy, Pandas, Matplotlib, Statistics, EDA, Data Preprocessing
- **AI & Machine Learning:** Scikit-learn, TensorFlow, Deep Learning, NLP, Computer Vision, YOLOv8
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Development:** React.js, Next.js, Node.js, Express.js, REST APIs
- **Tools:** Git, GitHub, VS Code, Postman
- **Core:** DSA, OOP, DBMS, OS, Computer Networks

EXPERIENCE

GenAI Powered Data Analytics Job Simulation — Forage | Sep 2026

- Performed exploratory data analysis, risk profiling, and delinquency prediction using AI-driven approaches.
- Created business reports and data storytelling to support an AI-driven collections strategy.

Artificial Intelligence & Data Analytics Intern — Edunet Foundation
Skills4Future Program | AICTE × Shell India Markets Pvt. Ltd. | Apr 2025

- Completed a 4-week virtual internship focused on Artificial Intelligence and Data Analytics with an emphasis on Green Skills.
- Gained practical exposure to AI and data analytics through the Skills4Future program

PROJECTS

Blood Bank Management System: (React.js, Next.js, PostgreSQL, Clerk, REST APIs)

- Developed a web-based platform for blood donor registration, blood requests, and inventory management with secure authentication.
- Implemented location-based donor discovery and database integration to improve donor matching and data management.
- Built a responsive interface with role-based access control for donors and administrators.

QuickBlog – AI-Powered Blogging Platform: (React, Express.js, MongoDB, Gemini API)

- Built a full-stack blogging platform with authentication, content management, and image uploads.
- Integrated Gemini API for AI-powered blog generation and implemented REST APIs with MongoDB.

Helmet Detection Using YOLOv8: (Python, YOLOv8, OpenCV, Deep Learning)

- Built a real-time helmet detection system using the YOLOv8 object detection model to identify helmet compliance in traffic scenarios.
- Trained and evaluated the model on annotated datasets using computer vision techniques to improve detection accuracy and performance.
- Integrated OpenCV for image processing and object localization, enabling efficient real-time safety monitoring.

CERTIFICATIONS

- **Data Science With Generative AI** by Physics Wallah.
- **Full-Stack Web Development** by Apna College.
- **Cyber Security Essentials** by CISCO NetAcad
- **Generative AI** by Physics Wallah.
- **DSA with Java** by Apna College.
